

Affores**

Native. Wild. Forever.

We create forests, using Miyawaki Method of afforestation.

The Miyawaki Method of afforestation.

A slope covered with exotic grass along the path from the main entrance, Yokohama National University(Feb. 1997)

Topsoil was added, and potted seedlings of the main species from the potential natural vegetation were mixed and planted closely.(Jun. 1978)

Same place after 3 years
Trees grew 3 meters. Shrubs with flowers were planted as a forest margin community.
(May. 1981)

Same place after 22 years.
(Dec. 2000)

Backyard Forests

We specialise in making forests in areas as small as 100 Square Metres (Approximately 1,000 Square Feet.)

Large Forests

And many of our forests are spread over acres and acres of area.

Afforestt Advantage

Compared to conventional landscapes and tree plantations. Forests made using Miyawaki Method grow 10 times faster, they have 30 times more green surface area. They are full of biodiversity, the process of forest making is 100 percent natural and free of chemicals.

Afforestt Advantage

These forests retain ground water, thus recharging the ground water table. They attract more birds, produce native fruits and improve air quality.

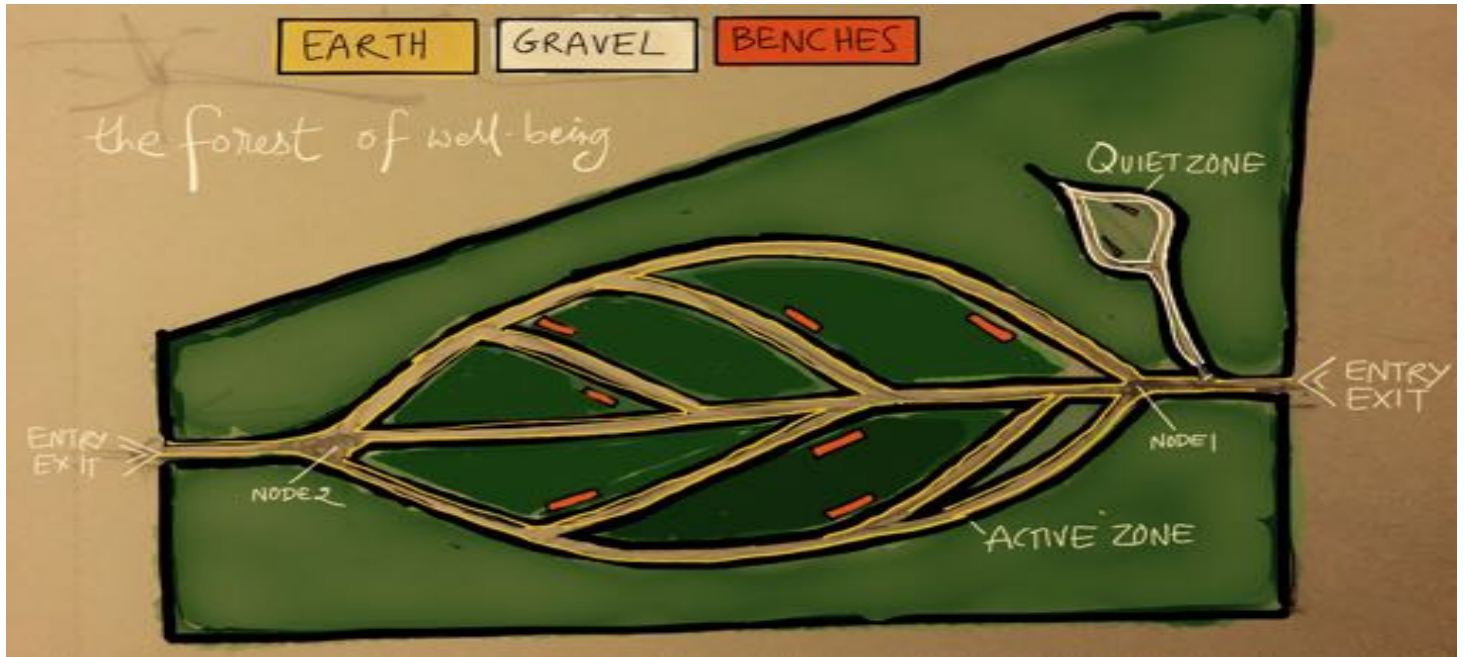

Services: Consulting

Consulting: We enable our clients to create forests using local materials and our methodology. We provide on-site and off-site consulting and ensure to grow a self-sustaining maintenance free forest in 2-3 years.

For quotation and scope of work, please visit: afforestt.com/consulting.html

Services: Forestscaping

We offer Forestscaping to develop a natural landscape that beautifies the look of your property and achieves ecological conservation objectives. The land can be restored to a natural state as native forest, managed as a bird habitat, a flowering wonder, a meditative wilderness space or turned into your private nature preserve. For quotation and scope of work, please visit: afforestt.com/forestscaping.html

Services: Online Training & Onsite Demo

Online training is to help individuals make a small patch of forest on their own, 8 hours of training spread over 2 days help the participants learn the Miyawaki method by understanding the ethos and Afforestt's Standard Operating Procedures, and also given a peek into our journey. For those who have attended our training, Onsite Demo helps individuals to make a small patch of forest using our on-ground support. More information at : afforestt.com/onsitedemo.html

Outreach

Founded in 2011, so far, (June 2017) we have made 96 forests in 34 cities in 6 countries. Our clients range from individual houses to large real estate projects, business parks, resorts, airports, metro rails, public parks, schools and large institutions.
